

TOP 7 QUESTIONS TO ASK

WHEN CHOOSING AN ON-SITE PRIMARY CARE PROVIDER

QUESTION

TWIN CITIES PHYSICIANS

PROVIDER #2

PROVIDER #3

1. Are you available 24/7 via phone if I have a question or concern?
2. Will you work with me even if my medications aren't being managed by my senior community?
3. Are you specialty trained and board-certified in Geriatrics?
4. Will you be able to visit me frequently if needed wherever I call home?
5. Do you have experts in Geriatric Pharmacology to assist me with my medications?
6. Do you coordinate my care with subspecialists, other providers, or hospitalists if needed?
7. Do you provide on-going educational opportunities for me, my family & my community?

YES! A live member of our care team is available 24 hours a day, 7 days a week to help you with anything that comes up. We're only a phone call away!

YES! We work with many patients who still manage their own medications. There is no requirement that your community manage your meds in order for us to work with you.

YES! Our providers are specialty trained Geriatricians. We know how important it is to have a provider who understands the unique medical needs of the senior community.

YES! We're proud to be able to visit all of our patients frequently, and in any senior community setting they call home - from independent living to assisted living communities & beyond. Regardless of your medical situation, we'll continue to provide you care. You can always count on continuity of care from our providers.

YES! We have nationally known and published experts in Geriatric Pharmacology to consult with you on the safest medications to take and some you may want to avoid. We understand the important role that the right medications play in your overall health.

YES! We help you determine what specialty care might be needed & then assist in coordinating your care so you can rest easy knowing that we're looking out for your total health and well-being.

YES! We partner with you and your community to offer educational opportunities and events to enhance your understanding of geriatric issues that affect your overall health.
